

INDOTA CM18 CHARGING CART

The **Indota CM18 32 Bay Trolley** is a safe and secure mobile trolley that offers storage and charging for iPads, Chromebooks, tablets and laptops.

The **Indota CM18** is a compact cart, perfect for those with limited space.

Each bay has its own dedicated power socket and with Indota's SMART charging system you can efficiently charge your devices, prolonging the battery life. Also with SMART comes the ability to choose when your devices charge on the programmable timer so if you have cheaper energy at night you can set it to charge then. Throughout, the trolley is built in Ventilation to ensure your devices are kept cool.

There are two variations of the **CM18 Cart**:

Indota CM18

The **Indota CM18** is designed for iPads, Chromebooks, tablets and small laptops that are all charged using their own AC adaptors. The rear of the CM18 has 32 surge protected plug sockets, ready for the user to just plug in and begin charging.

Robust dividers, with cable management allow you to simply slot in your desired devices, and attach the connector that feeds in from the rear of the cabinet.

Indota CM18 Plus—Syncing Version

Indota CM18 Plus provides secure charging, syncing and movement of your devices. With built in sync facility you can simply sync all your devices with a master iPad or laptop.

The intelligent PCB inside the unit can detect the type of device that has been connected and emit the correct power, allowing for the most optimised charging rate.
